

Vacancy: Licensed B1/B2 aircraft maintenance engineer

Company description

Dynamic Aviation BV is an EASA Part-145 general aviation MRO located at Lelystad Airport and has a large Scope of Work in the categories single engine aeroplanes, helicopters and piston engine overhaul. Due to the growing demand for aircraft maintenance, we are looking for a B1/B2 licensed aircraft maintenance engineer. The following AML-categories would meet our demand: B2 (group 3 aircraft and/or Robinson helicopters), B1.2, B1.3 and/or B1.4. Any combination of the afore mentioned is preferred.

Work description

- Performance and release of aircraft maintenance and modifications according the prescriptions and regulations
- Supervising and guiding mechanics and trainees

Qualifications

- In possession of a valid Part-66 AML in the afore mentioned categories
- Proven, recent work experience in the AML-categories
- Good knowledge and application of Human factors
- Good verbal and written communication skills in the Dutch and English language
- A driven attitude to work, both independently and in a team

What we offer

- A young and dynamic work atmosphere
- Participation in the implementation and improvement of the daily processes (continuous improvement)
- Possibilities to carry out activities at component level in addition to aircraft maintenance

If you meet the profile above and are interested in this vacancy, we would like to receive a detailed motivation letter and CV. Contact details: info@dynamicaviation.nl attn. Mr. E. Jesterhoudt

Have you passed all Part-66 part modules but not enough work experience or do you not meet the profile above in another area, but do you expect to be a suitable candidate? Send us a detailed letter of motivation in which you clearly describe what your ambitions are, to what extent these have been achieved so far and how you expect to be able to realize them with us. Perhaps we can meet each other in this.
